

# Sustainable mobility: a new story for participation

Gabriele Iannaccone | PhD Candidate | Roma Tre University

Mobility Powered by Youth  
Brno, Czech Republic  
20 September 2022

# Outline

- The project
- Case study
- Results & lessons learned

The project:

# L-3D: a new dimension of participation

# L-3D: how it works

Step 1: Experimental design

Step 2: Questionnaire

Step 3: Strategic measures prioritisation

Step 4: Digital storytelling/Measures validation

Software L-3D

# Step 1 - Experimental design

Which areas?

Which feasible measures?

Questionnaire creation

*Stakeholders' co-creation*

# Step 2 - Questionnaire

Stakeholders prioritize specific strategic measures

Youfone BE Proximus 100% 12:04

 L-3D

1 2 3 4 5 6 7 8 9

Step 1

**Quale alternativa preferisci?**

Area strategiche	Opzione 1	Opzione 2
Accesso ZTL	Restrizioni mezzi inquinanti	Agevolazioni mezzi green
Interventi trasversali	Logistica green nelle gare pubbliche	Infrastrutture ricarica elettrica
Facilitazioni operative	Corsie preferenziali	Aree carico/scarico

# Step 3 - strategic measures prioritisation

- The software translates stakeholders' answers into a ranking of the top shared policy mix providing the satisfaction degree for each stakeholders' type

# Step 4 - Digital storytelling & Measure validation

- Digital storytelling is used to validate scenarios and to understand how the preferences change knowing the others' opinion and visualizing dynamically the scenarios and its impacts.

# Case study

# 2022: SULP for Rome urban + metropolitan area

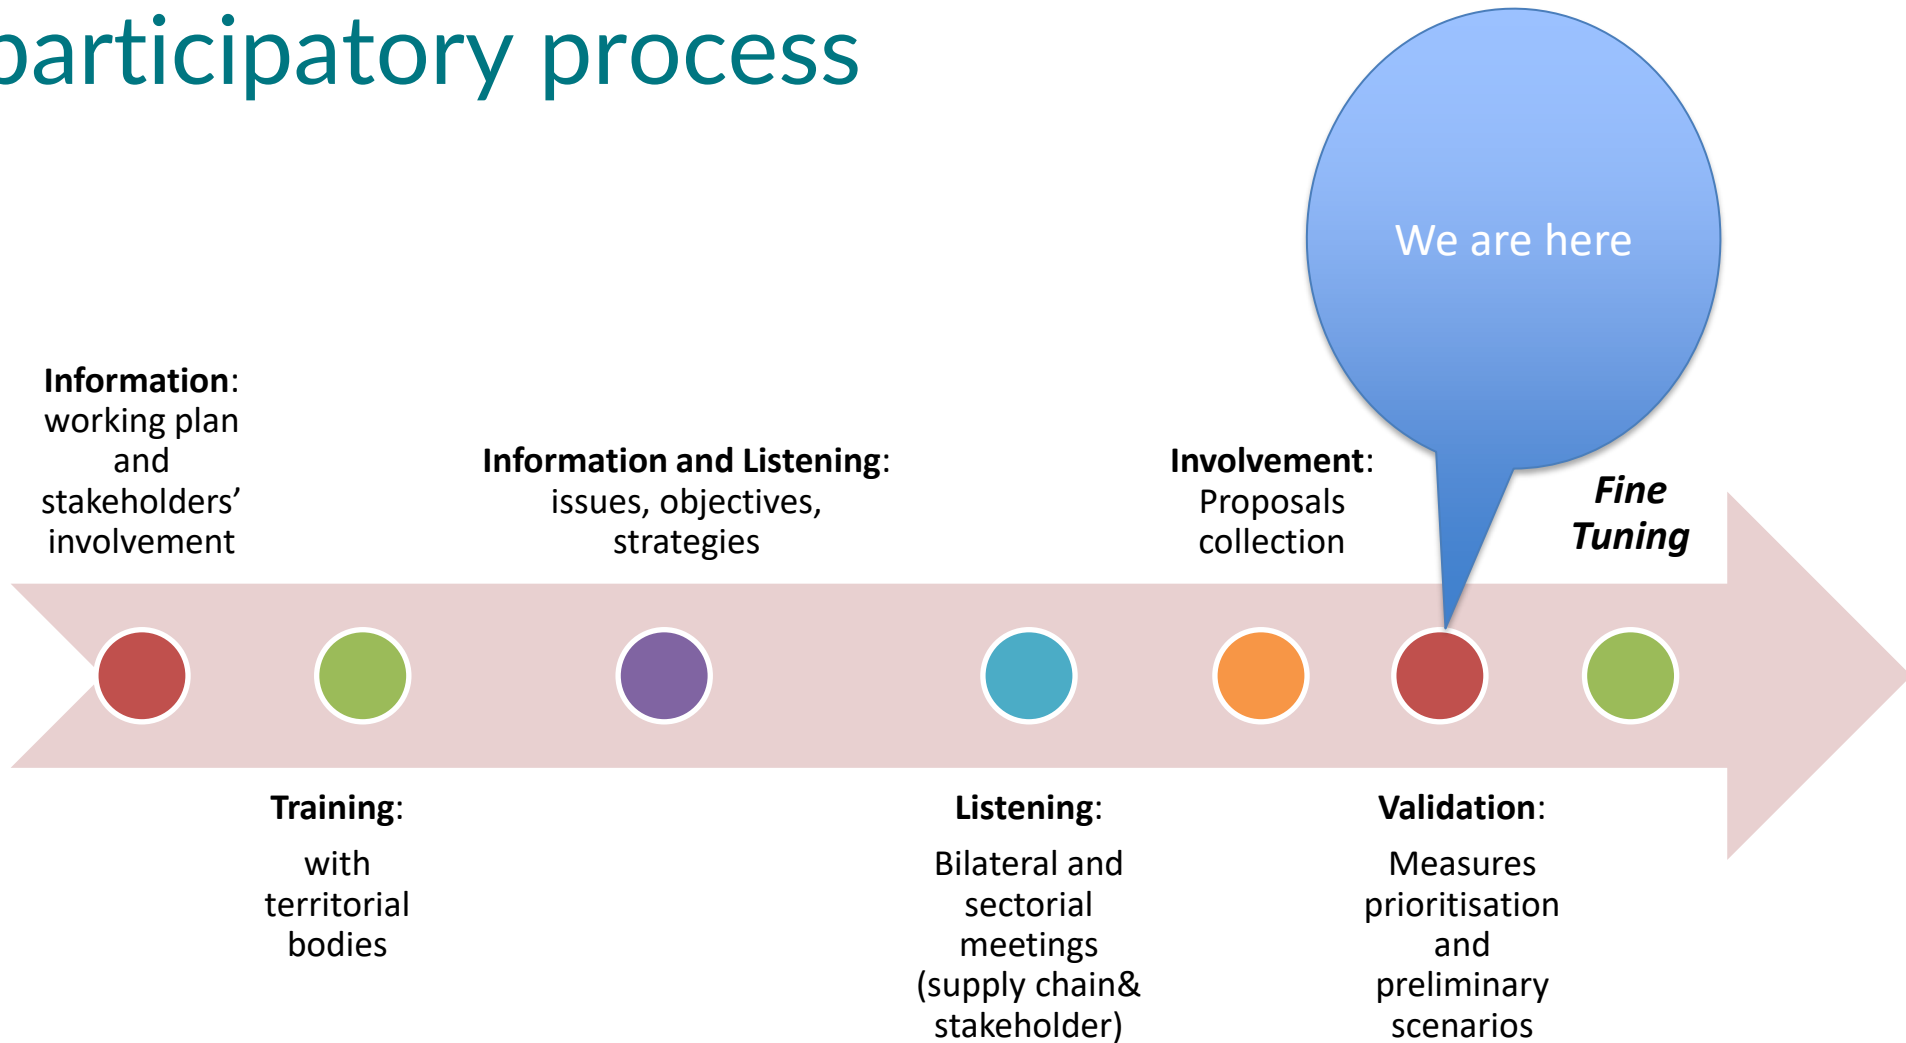

Credit: Comune di Roma

Credit: coopfairoma.it

# Sustainable Logistics Plan of Rome Metropolitan City: the participatory process

# 12 July – The launch of the first demo

The screenshot shows a video conference interface. The main content area displays a presentation slide with a large loading icon (a circle of radiating bars) and the word "LOADING" below it. To the right of the loading icon, the text "Elaborazione risultati" is visible. In the top right corner of the slide, there is a logo for "L-3D". At the bottom of the slide, there are logos for "Moving innovation" and "TRANSPORT RESEARCH LAB". On the right side of the video conference, there are two video thumbnails: the top one shows a man with a beard, and the bottom one shows a woman with glasses and a headset. Below the thumbnails is a grid of participant avatars, including icons for "T" (Trelab), "IM" (Ila Stefania Maltese), "MM" (Massimo Marciari), "MS" (Marco Surace (RS...)), "DG" (Domenico Gramis), and "+25".

# Results & lessons learned

# Policy mix prioritization: best policy mix

Best policy mix

Degree of satisfaction

- Monitoring improvement
- Green procurement
- Preferential lanes green vehicles
- L/U availability
- \$ off-hour deliveries

Transport  
Providers

Receivers

Senders

*Best policy mix + degree of satisfaction per stakeholder = catchier way of presenting results*

# Consensus map

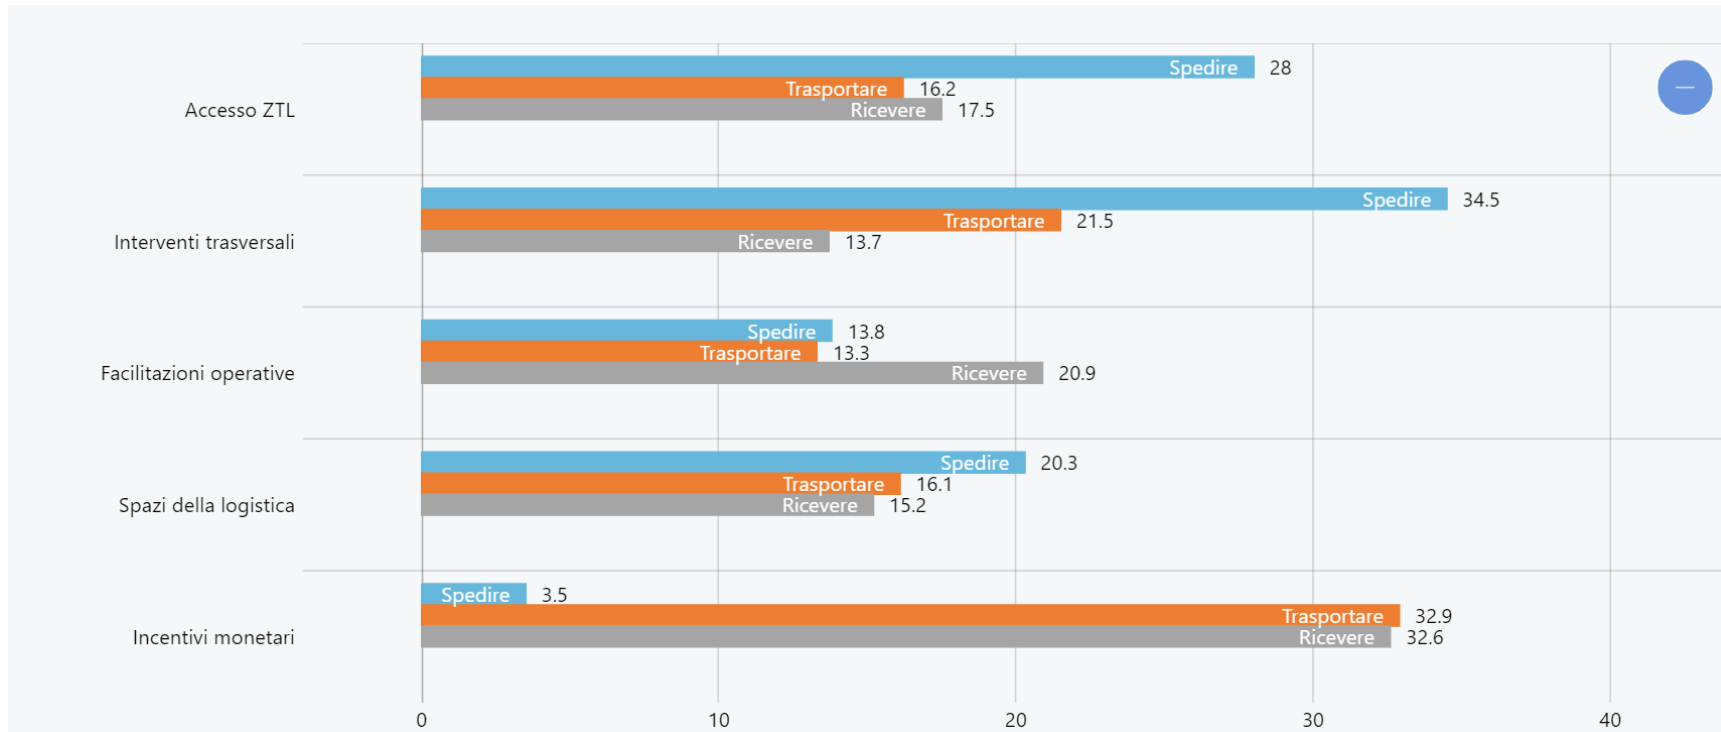

Strategic areas	Transport Providers	Receivers	Shippers
LEZ Accessibility	Monitoring improvement	Green vehicles agevolations	Monitoring improvement
Transversal intervention	Logistics in the urban planning	Green procurement	Green procurement
Not monetary incentives	Preferential lanes green vehicles	Preferential lanes green vehicles	Preferential lanes green vehicles
Logistics spaces	Integrated microhub network	Integrated microhub network	Integrated microhub network
Monetary incentives	\$ green vehicles	\$ consolidation	\$ green vehicles

Not shared strategic measures

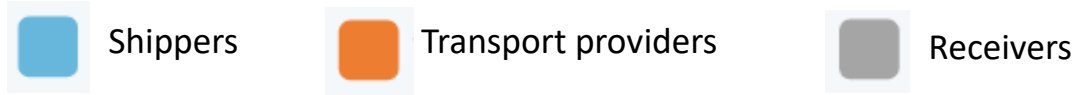

Shared strategic measures

*Discussion around shared starting point(s) facilitates consensus*

# Partworth utilities

Credit: own source

*Partworth utilities allow detecting the strategic area(s) where stakeholders' interests are stronger*

# Strenghts and next steps

# Strengths

- Offering a methodology improving stakeholders' participation, while guaranteeing:
  - Speed
  - Transparency
  - Flexibility

Credit: rowpixel

# Next steps

- Broaden the number of respondents
- Automate step I of the process
- Apply the methodology to other policy/research areas
